

Lexington County continues efforts in diverting compostable material from ending up in the landfill by producing compost, mulch and promoting backyard composting

Lexington County Wood Grinding Facility (498 Landfill Lane, Lexington)

continues efforts in providing the community and businesses with a quality - high carbon/low nitrogen compost. Lex-Co Compost is made from clean wood waste, greenery, grass clippings, and leaves. Lexington County is a proud participant of the US Composting Council, receiving a compost certification through the US Composting Council Seal of Testing Assurance Program. The Lex-Co Compost is also a Certified South Carolina Product®.
